

3 minutes
fire? get out fast!
gone in a second.

Make sure your smoke alarm is working properly. Test your smoke alarms regularly and ensure they are installed in your escape route(s).

Be familiar with your escape route. Find out how to get out fast, think about warning fellow residents and agree upon a meeting place outside the building. Always keep your escape route(s) free from obstacles.

112

Call emergency number 112 as soon as you are outside. Stay calm, state your name and full address. Wait for the fire brigade and share any specific information with them.

More than often you will hear people claim: “When my place is on fire, I will grab my photographs and run.” Fine words, but you simply do not have the time! From start to finish you have 3 minutes to get out of the fire alive. No more, no less.
